# Financial Advisor

-Tanny-

Your intelligent financial advisor,  
guiding every decision with clarity and confidence

**GET STARTED →**

# Pain points

- 01 Financial information is abundant but scattered across multiple sources
- 02 Many financial terms are difficult to understand for ordinary users
- 03 Users have to switch between multiple websites to calculate and compare
- 04 People struggle to interpret what numbers actually mean for their financial situation
- 05 Current tools only show data but don't explain or guide

# Solutions

## Large Language Model or LLM with Tool Calling

to enable the system to understand user questions and invoke the relevant computational functions accordingly.

- Financial Health Checkup

Evaluate financial well-being

- Smart Investments & Savings

Plan smarter savings and investments.

- Best Banks for Saving

Compare the best deposit rates.

- Loan Calculator

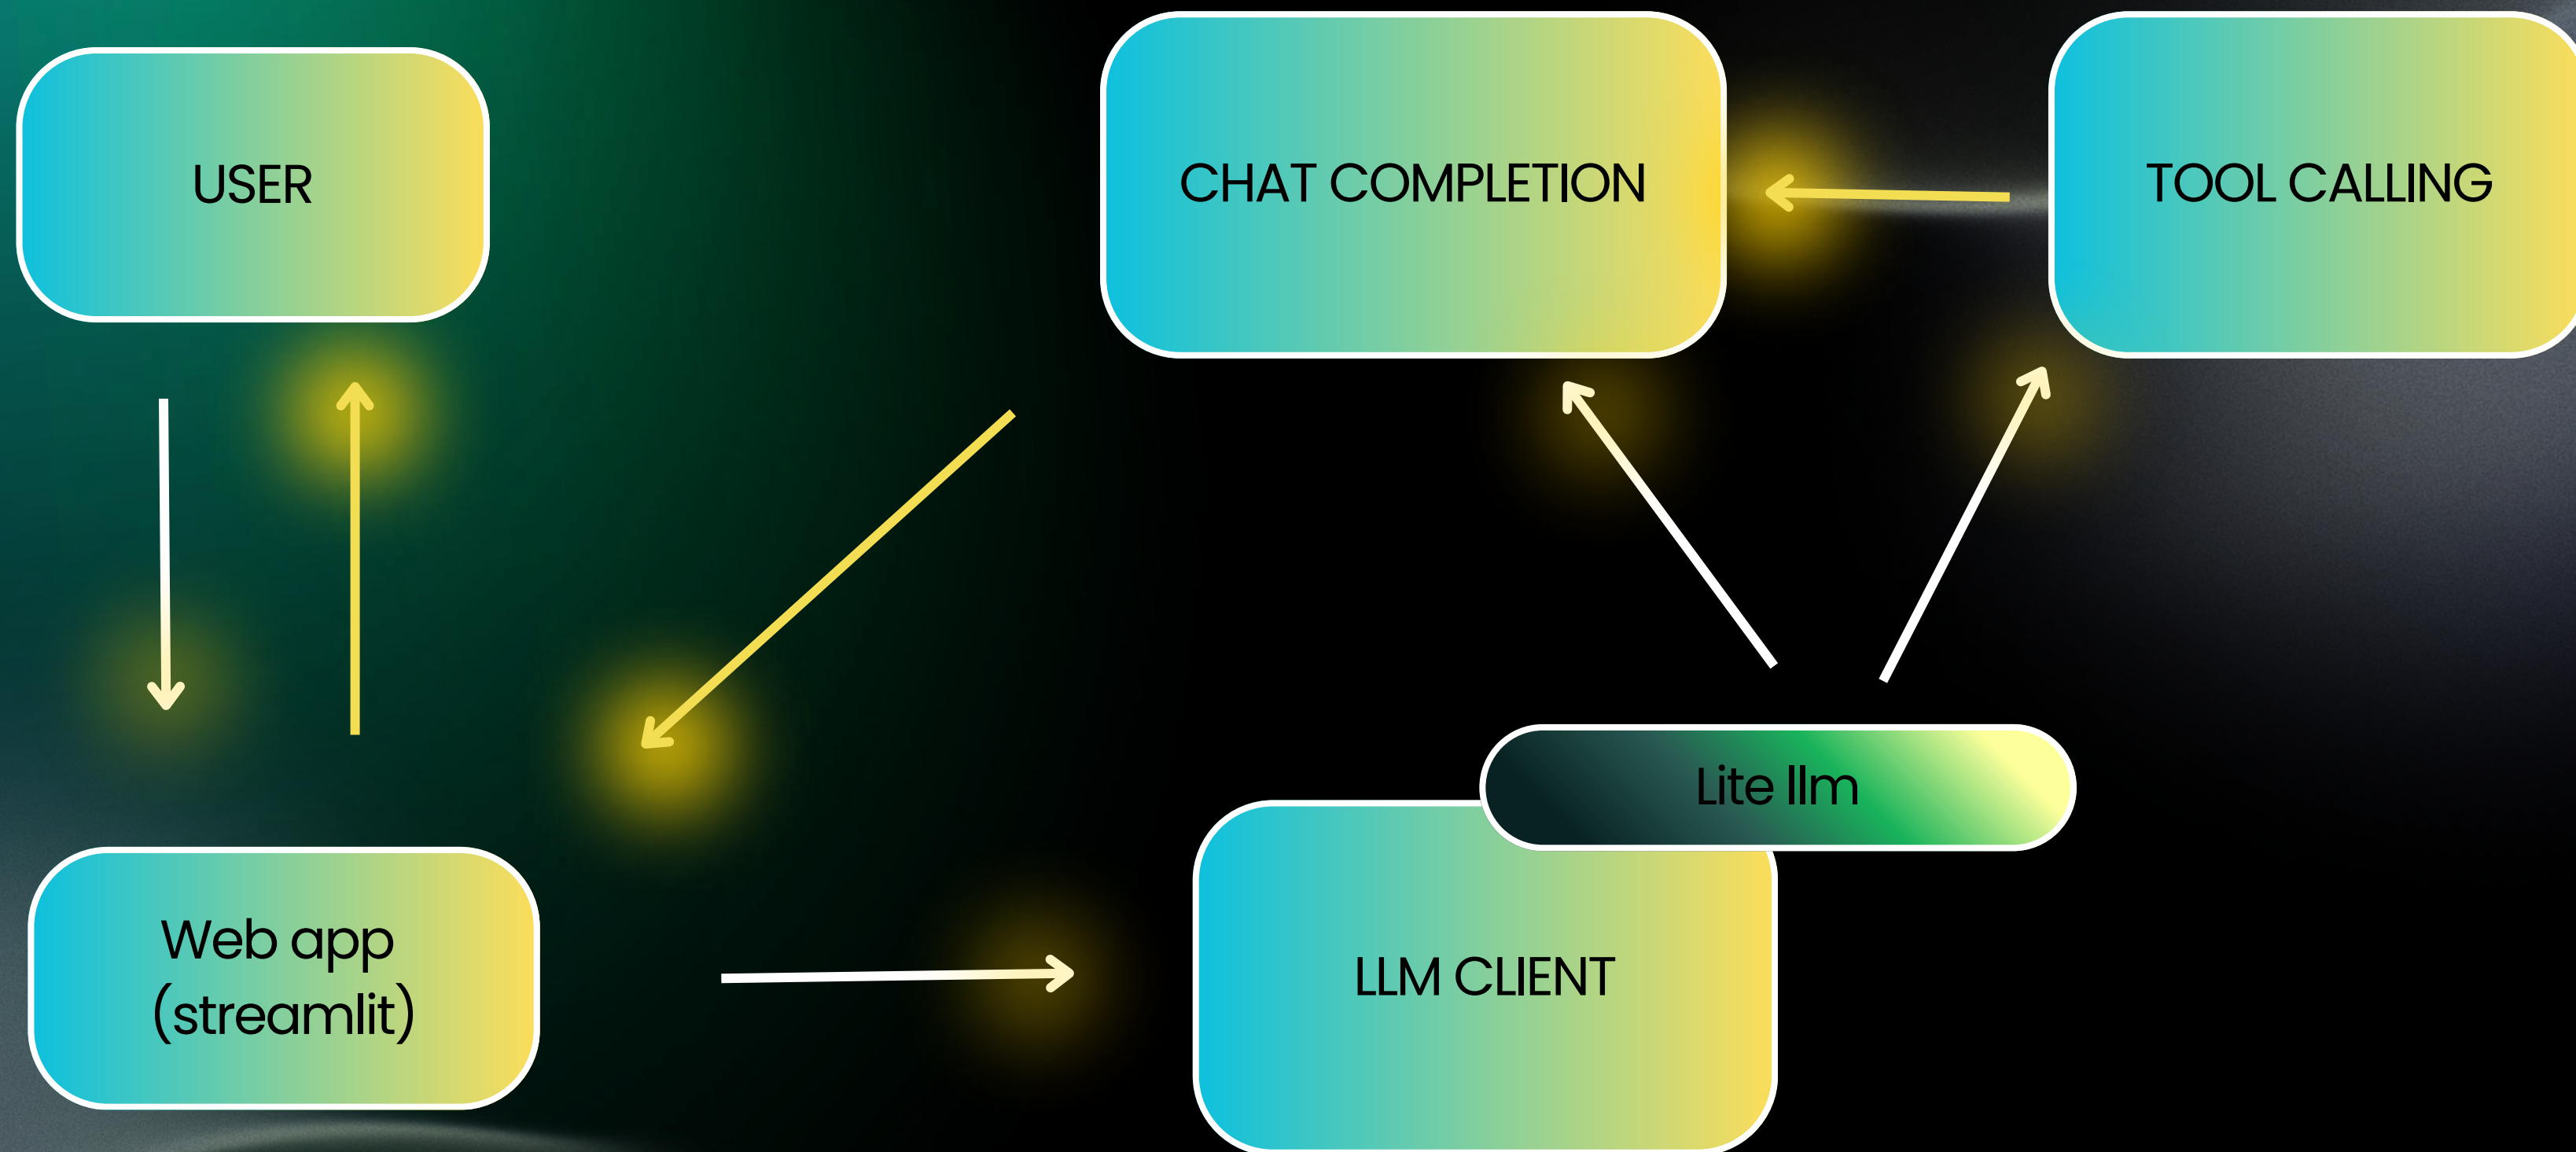

Calculate and compare loan plans.

- Tax Calculator

Estimate taxes and suggest basic deduction strategies.
